

Project Design Phase

Solution Architecture

Date	15 February 2025
Team ID	LTVIP2025TMID52150
Project Name	<i>Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau</i>
Maximum Marks	4 Marks

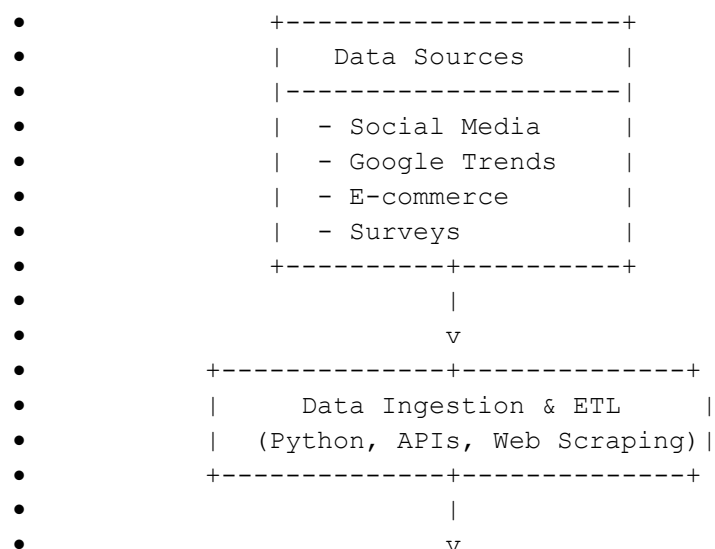

Solution Architecture:

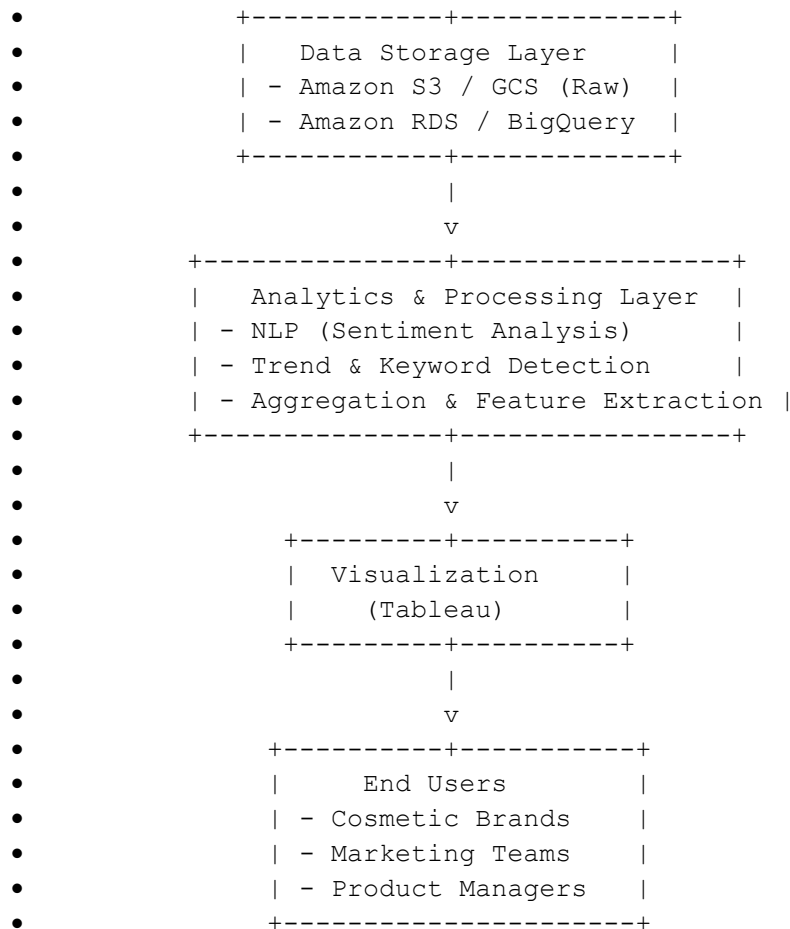

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
